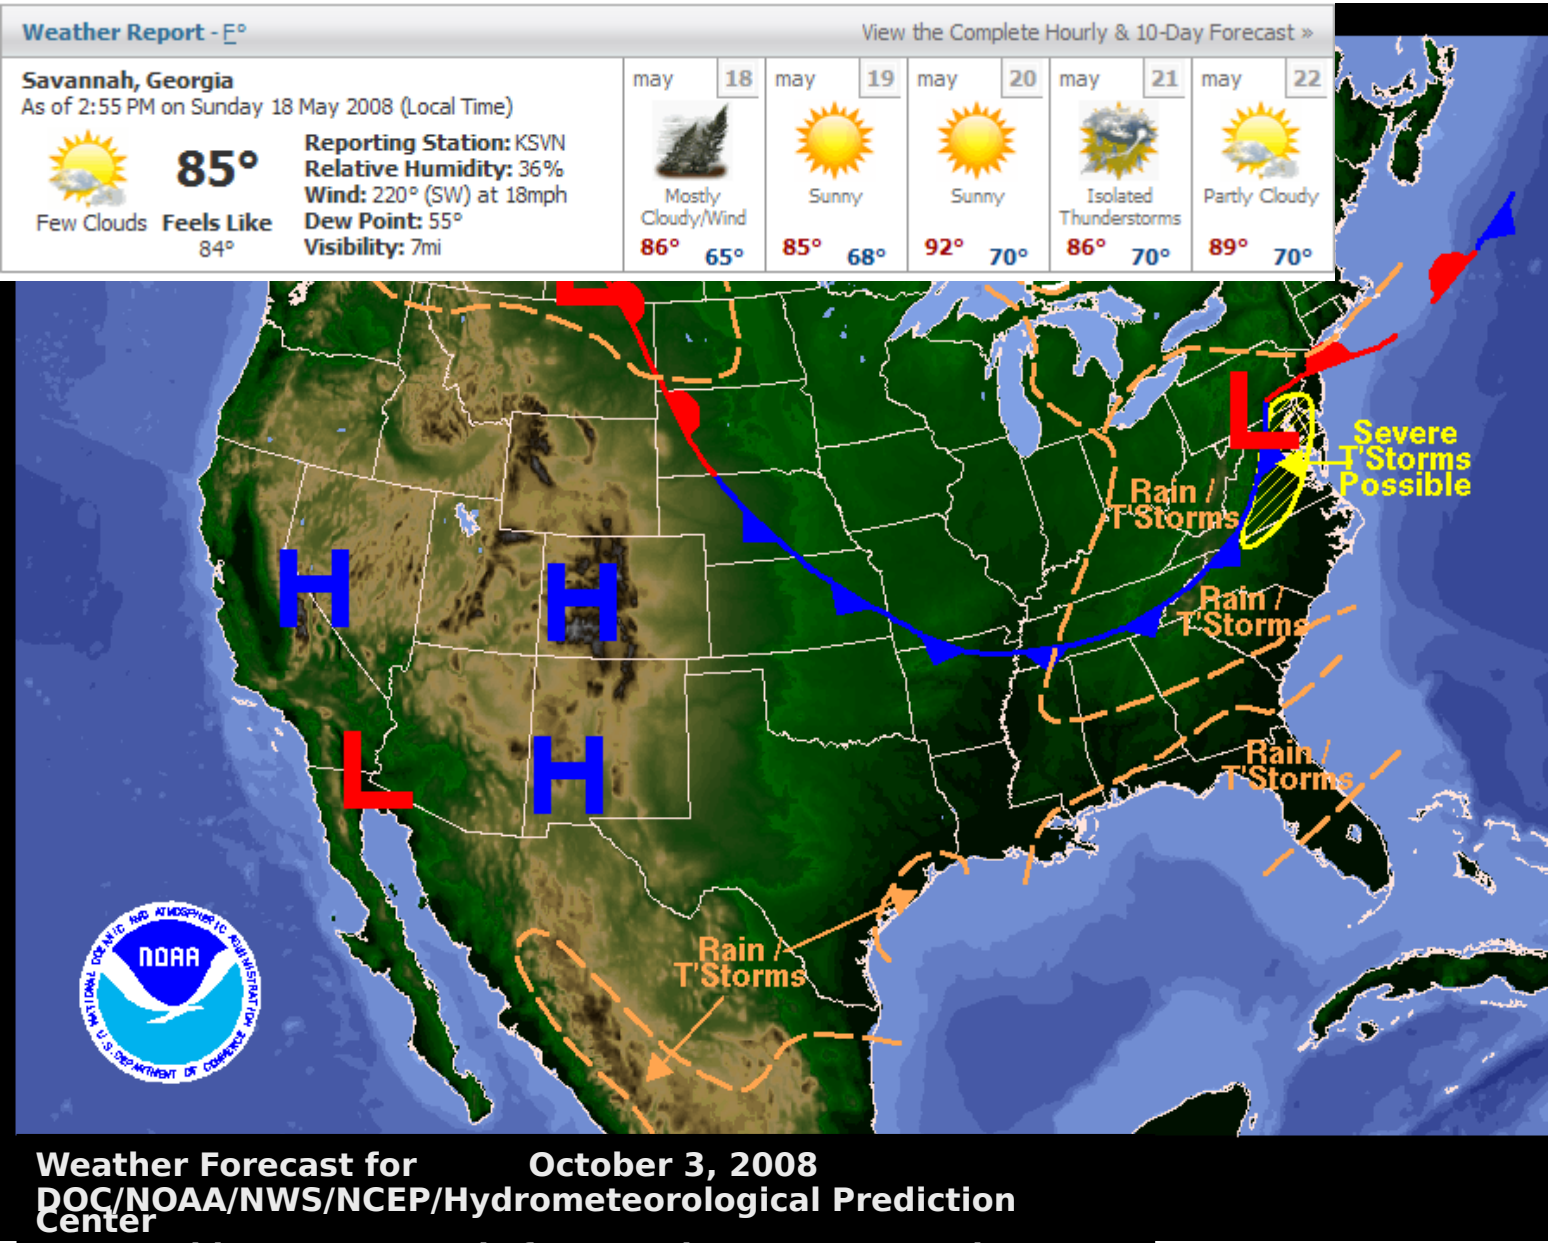
Hurricane Dave (L+3)



Weather Forecast for October 3, 2008
DOC/NOAA/NWS/NCEP/Hydrometeorological Prediction Center

Current Weather Forecast call for a moderate chance of Thunderstorms for the next several days but no impacts to on-going Response and recovery efforts is anticipated.

Flooding in the Downtown areas of Savannah have receded.

US Army Corps of Engineers
South Atlantic Division

** EXERCISE - EXERCISE - EXERCISE **

Hurricane "Dave" L+3 Days

Preliminary Damage Estimates: Preliminary Damage Assessments (PDA) continue to confirm that damages exceed earlier estimates. The fact that residents resisted evacuation has created a significant shortage of basic commodities and shelter. Massive relief efforts continue to provide drinking water and other essential commodities to the population in and around Savannah as well as the communities along the Georgia coast into South Carolina.

Recovery efforts continue in Georgia and South Carolina. USACE Recovery Missions in support of FEMA include Temporary Roofing in two states, assistance to FEMA on temporary housing, and debris removal. Power to the area is 75% restored and flood waters have begun to recede from low lying areas.

The Savannah District has been declared a Impacted District and is establishing a Recovery Field Office (RFO) in Macon Georgia to manage the FEMA Assigned recovery missions and what appear to be significant Public Law 84-99 Flood recovery operations.

USACE Specific Issue:

Specific to the USACE, the evacuation of the Savannah District Office has created an issue with Re-establishing Command and Control and access to the Corps of Engineers Financial Management System (CEFMS) to manage a multi-Billion dollar Military Construction Program. The Savannah District activated their Continuity of Operations Plans (COOP) and Notification plans prior to the storm making landfall.
